# Capabilities

We provide training, advisory, and continuing education programs to better prepare your organization for evolving threats and emergency situations.

## Our Team

Tomahawk personnel include Special Forces operators, corporate security experts, specialized law enforcement officers, and medical professionals. Our careers have been defined by accomplishing complex missions in the most difficult of circumstances.

Members of the Tomahawk team have played pivotal roles in conducting overseas counterterrorism activities, responding to mass shootings in the United States, developing security policies for corporate enterprises and law enforcement agencies, training premier law enforcement and military organizations, and protecting dignitaries—both foreign and domestic. Tomahawk brings an unparalleled level of expertise to emergency and crisis management training and consulting services.

## Our Approach

Tomahawk develops custom-tailored strategies for all of our clients, taking the unique needs and culture of each organization into consideration. Building a strong relationship between companies and first responders is a core element of our philosophy, as it better prepares both the organization and the local community to respond to emergency situations.

The Tomahawk model is simple and straightforward—we partner with our clients. We do not walk away after delivering a service, course offering, or seminar. Rather, we strive to create and foster long-term relationships and initiate an open dialogue to best understand our partners' challenges. We are passionate about our work and dedicated to helping our clients achieve their goals.

**We bridge the gap** between the corporate sector and law enforcement.

**We make communities safer.**

## Vulnerability & Risk Assessment

---

We offer a full spectrum of programs to identify and provide solutions to a company's security vulnerabilities.

- **Physical Security Review & Consultation:** The physical security of an organization is the first line of defense in either stopping or deterring a threat. Tomahawk has extensive experience providing our clients—in both government and commercial sectors—with physical security assessments.
- **Penetration Testing:** Tomahawk Strategic Solutions will utilize a phased process in order to evaluate the strengths and deficiencies of a designated facility.

## Policy Review and Development

---

We help develop or refine security-related policies and procedures that address an organization's security-related challenges while considering the organization's culture, norms, and everyday business practices.

## Interactive Threat Seminar

---

The Tomahawk Interactive Threat Seminar educates personnel in situational awareness and personal considerations in a crisis situation. The seminar presents sensitive topics in an educational manner, providing a unique perspective and proven techniques for employees to navigate low- and high-stress situations.

## Armed Guard Training Programs

---

We develop and maintain programs to equip and train employees and armed security personnel. Tomahawk's armed guard training utilizes a full-spectrum approach, with an emphasis on de-escalation, that educates guards in the proper procedures to identify and respond to active threats, interface with law enforcement, and help ensure the safety of employees. Tomahawk also educates armed guards on emergency medicine, critical thinking, and effective communication protocols.

## Executive Protection Programs and Training

---

We will provide executive protection personnel with the knowledge and training required to successfully shield key executives from potential threats.

## Incident Response and Crisis Management Exercise

---

We provide hands-on training to employees and security personnel, while integrating law enforcement and first responders, to provide individuals and organizations with practical experience in a variety of real-life scenarios.

## De-Escalation Training

---

Our de-escalation training focuses on applying proven communication skills and decision-making tools to create space and slow an incident down, enabling better control and helping to create a positive outcome.

## Corporate Emergency Medical Training

---

We train and certify individuals to provide immediate trauma care at the point of injury to bridge the gap of time from when an injury occurs to when trained first responders arrive. This emergency medicine instruction strengthens the readiness of an overall institution and provides a tangible skill set for individuals to take home with them.

## Patrol Officer Tactical Response

The Patrol Officer Tactical Response Program is designed to give officers hands-on experience responding to active threats. This program trains officers to respond in one-, two-, three-, or four-person elements.

## Situational Awareness & De-Escalation

Our de-escalation tactics, techniques, and procedures train officers to create more time, space, and distance, helping ultimately to slow an incident down to enable better decision-making.

## Firearms Instruction

Our pistol, rifle, and concealed-carry training focuses on the fundamentals to take individuals and units to the next level.

## Specialized Training Programs

We develop custom programs for law enforcement that are created to meet specific organizational needs.

## Tactical Unit Assessment

We help identify strengths and weaknesses within an organization and provide recommendations to optimize the function of a tactical team.

## Close Quarters Clearance (CQC)

We provide Methodical Clearance™ and Hostage Rescue CQC that will refine, re-establish, or develop a unit's tactical standard operating procedures (SOPs), ensuring every officer is uniformly trained on the same tactics and methods—tactics refined over years of combat lessons learned from a national mission force.

## Sniper Instruction

We provide urban and rural sniper training that is tailored to an organization's operating environment.

## Emergency Medical Training

Tomahawk Strategic Solutions is the industry leader in the development and delivery of a multitude of emergency medicine programs.

## Team Leader & Mission Planning

We offer Team Leader and Mission Planning courses that are designed to enhance individual and unit capabilities.

## Bomb Tech | EOD

Our programs will prepare bomb technicians to work alongside tactical teams and handle modern explosive devices.

**We are dedicated to serving our clients with the utmost transparency and providing a deliverable that far exceeds client expectations.**

We continue to deliver sustainable results for our clients and our communities.

## Tomahawk Institute

The Tomahawk Institute is an online platform designed to share our collective knowledge and real-world experience. Our programs are purpose-built and drawn from our shared experience, then thoughtfully authored to be relevant, realistic, and relatable. We work with organizations big and small to improve security, response, and crisis management. But at our core—we strive to make communities safer. It's our passion and it's why we launched the Tomahawk Institute.

## Product Solutions

In partnership with industry-leading manufacturers, our team of experts hand-select and deliver the highest quality equipment to meet our clients' needs.

# We are proud to work with clients across various industries.

Financial, Healthcare, Universities and School Systems, Energy, Maritime, Sports and Entertainment, Federal and Municipal Law Enforcement, Military, Commercial and Residential Real Estate, Private Family Offices, and Telecommunications.

## Here are some of our partners.

Our ability to adapt to each client's unique set of circumstances, requirements, and goals sets us apart from the rest of the industry and allows us to succeed with an extensive but varied client base.
