At Tomahawk Strategic Solutions, we believe that operators perform at the level to which they have been trained. Our law enforcement training programs combine cutting edge tactics, techniques, and procedures with a proprietary approach to mindset and awareness. This approach enables officers to make rapid, life-saving decisions under stress while reflexively applying advanced skills. Tomahawk’s training works to substantially improve mission success, officer and civilian safety, while simultaneously reducing liability.

Tomahawk instructors are retired tier one operators from the special operations community and hand-selected law enforcement officers. Each instructor has extensive experience applying a range of skill sets and working with a variety of domestic and international partners. Tomahawk’s training is conducted in the operating agency’s home environment to maximize each organization’s ability to sustain its customized program.

TRAINING AND SERVICES

- PATROL OFFICER TACTICAL RESPONSE
- BOMB TECH/EOD
- SNIPER INSTRUCTION
- SPECIALIZED TRAINING
- CQC SWAT/ESU
- FIREARMS INSTRUCTION
- EMERGENCY MEDICINE
- UNIT ASSESSMENT
**TRAINING AND SERVICES**

*Tactics are validated or discredited through opposition.*

---

**PATROL OFFICER TACTICAL RESPONSE (POTR)**

The Patrol Officer Tactical Response course is designed to train patrol officers on basic two- and four-person team tactics, the fundamentals of search and contact teams, and prioritizing threats through scenario-based training exercises. Additionally, POTR will provide officers with standard operating procedures (SOPs) for coordinating with other officers and first responders. Ultimately, the goal of this course is to ensure all officers have a common foundation for operating in tactical environments, thereby improving officer safety, civilian safety, and response efficiency.

---

**CQC SWAT/ESU**

Tomahawk provides courses of instruction in Hostage Rescue and Methodical Clearance CQC that will refine, re-establish, or develop a unit’s tactical SOPs, ensuring every officer is uniformly trained on the same tactics and methods—tactics refined over years of combat lessons learned from a tier one national mission force.

---

**BOMB TECH/EOD**

Current trends indicate that active shooters are increasingly likely to utilize IEDs, explosives, or bomb making material. This emerging threat has led to rapid emersion of the bomb technician into Emergency Services Units (ESU) or Special Weapons and Tactics Teams (SWAT).

Tomahawk’s training will prepare bomb technicians to work alongside tactical teams and handle modern explosive devices. Our team specializes in suicide vests, impedance to assault, booby traps, movement of personnel around a suspicious object in a tactical situation, and the complete integration of the bomb technician into small tactical units. At Tomahawk, trainers have years of experience working as bomb technicians as part of special operations units.

---

**FIREARMS INSTRUCTION**

We offer firearms instruction that is tailored to your individual or organizational needs. Our instructors have decades of firearms experience while dealing with real world opposition. From Pistol, Long Gun, or Conceal Carry, we have the programs to take you to the next level.
SNIPER INSTRUCTION

Tomahawk’s sniper instruction is led by some of the finest military special operational snipers in the world, with unparalleled combat experience. We can customize a sniper training program to fit your specific needs.

The Patrol Officer Urban Tactical Marksmen (UTM) Course of Instruction (COI), designed by Tomahawk Strategic Solutions, aims to educate patrol officers on the proper techniques for addressing threats in an urban environment. Officers will be educated on the fundamentals of urban mission planning, employment, and risk assessment through many scenario-based training exercises. The UTM COI is designed to train officers in the core phases of urban operations, as well as provide officers with standard operating procedures (SOPs) for mission coordination with other officers and first responders.

EMERGENCY MEDICINE

Tomahawk provides top-of-the-line emergency medicine instruction to law enforcement and first responders. The emergency medicine courses prepare law enforcement officers and first responders with the skills and knowledge necessary to save lives during and after a traumatic incident.

The Law Enforcement and First Responder Tactical Casualty Care (LEFR-TCC) course covers several topics, ranging from the proper use of tourniquets to effective packing of gunshot wounds. Tomahawk’s emergency medicine curriculum can be taught as stand-alone courses or as part of a larger training program.

Our emergency medicine courses, when taught to first responders, focus on Rescue Task Force concepts to maximize efforts and minimize the loss of life.

SPECIALIZED TRAINING

Tomahawk Strategic Solutions offers programs for law enforcement that are developed to meet your specific needs. Please contact us so that we can work together in developing your customized training solution.
UNIT ASSESSMENT

Tomahawk Strategic Solutions conducts assessments of tactical teams, which include evaluations of each team’s personnel, equipment, facilities, and practices. In order to collect data for an assessment, Tomahawk will conduct a multitude of interviews, tour team premises, and evaluate the unit’s inventory. Based upon extensive experience working and training with SWAT and ESU teams worldwide, Tomahawk will synthesize the data collected to compile any items of concern, and provide recommendations based on best practices.

Areas of focus will include foundation, organization, leadership, training/preparation for real word success, and tactical gear/equipment.

Our tactics have not been proven because of the amount of operations we have conducted—our tactics have been validated by the amount of operations we have conducted where opposition credited, or discredited current tactics.
